

Top 60 accounts to follow on *X* *today.*

The future gets posted on X first. Raw, unedited, usually by the person who built it.

Model launches. Funding rounds. Chip wars. Market crashes. By the time it reaches your reels, the people on this list have already moved on to the next thing.

Your feed is an input. What you let into your head long enough starts arranging your life. Choose it on purpose.

ONE MORE THING

You're already *ahead.*

Most people will save this list and never open it again. If you followed even ten of these accounts, you're not most people.

Now add one more.

I build with AI, break things, and write down what I notice. AI, tools, startups, money — and the questions that won't leave me alone.
